

NEW FRAGMENTS OF THE BUDDHANĀMASŪTRA

Two complete folios of a manuscript of the Buddhānāmasūtra have already been edited by A.F.R. Hoernle¹ who, however, could not identify them. In 1984 G.M. Bongard-Levin and M.I. Vorob'ëva-Desjatovskaja² edited four fragments of the manuscript SI P/70 from the Petrovsky collection (St. Petersburg). In 1987³ these fragments

¹ "Three further Collections of Ancient Manuscripts from Central Asia", in JASB, 1897, pp. 231-233. They belong to the Godfrey manuscripts and are described on p. 227: "The first set consists of long oblong leaves measuring 11x2 1/2 inches. Two of these leaves are shown on Plates VIII and IX. There is a third leaf of this set which is nearly perfect. Besides, there are two small fragments. The total is five pieces of manuscript...." The find-spot is given on p. 226 according to a letter of S.H. Godfrey as "near some old buried city in the vicinity of Kuchar". A.F.R. Hoernle ("A Report on the British Collection of Antiquities from Central Asia. Part II", in JASB, *Extra-Number* 1 (1901), 1902, p. 17 [no. 3]) corrected himself: "Described (not quite correctly) and figured in [...]. A mere fragment of the book, only two complete leaves, and two small pieces of a third, surviving." On pp. 17 and 31 he supposed that the manuscript was found at Dandān-uiliq. I could trace these fragments in the British Library (Oriental and India Office Collections), London. They are put between panes of glass with the signature Brit. Mus. Or. 6403 B (1). The first leaf is folio 9 (with the sigle G 7), the second leaf is folio 11 (with the sigle G 1), and the two fragments (without sigle) are parts of folio 10.

could be identified as belonging to the "Buddhanāmasūtra" and were edited again together with the fragment SI L/2 from the Lavrov collection (St. Petersburg), which was supposed to belong to the same manuscript. The Buddhanāmasūtra has been translated into Tibetan with the title "*Sais rgyas kyi mtshan lia ston bži brgya lia bcu rtsa gsum pa*" (Buddhanāmasahasrapañcaśātaṭṭripaṇḍaśa)⁴ and into Chinese with the title "Wūqianwǔbāi fómíng shénzhòu chǎnzàng mièzù jīng"⁵. O. von Hinüber⁶ has dealt again with the fragments SI P/70, SI L/2 and Godfrey fol. II. In his opinion the fragment SI L/2, which has no counterpart in the Tibetan translation, does not belong to the manuscript SI P/70. He refers to a list of Tathāgata names in the Gaṇḍavyūhasūtra (Gv 256.6-259.19), in which almost all the names of the Sanskrit Buddhanāmasūtra occur. The fragments SI P/70 and SI L/2 have been edited again in 1990 (BB 34, pp. 278-292) together with some new fragments of the Petrovsky collection: SI P/60 (one fragment), SI P/61 (three fragments), and SI P/71a (one fragment). On the basis of this publication O. von Hinüber⁷ reconstructed the Sanskrit text of the Buddhanāmasūtra as far as the folios in the Petrovsky collection and in the Hoernle collection were concerned. In 1994 I was able to trace the two fragments of folio 10 of the Godfrey MS., mentioned in note 1 above, and to identify the fragment Hoernle 143 S.A. 14 (S.A^{IV} 4) as belonging to the Buddhanāmasūtra⁸.

Recently I came across some new fragments of the *Buddhanāmasūtra*. They belong to the following collections:

Stein⁹: D. iv.3; Kha. i.204; Kha. i.316; Kha. vi.3

Hoernle: without no. (SH 162)¹⁰; G7 [Or. 6403 B (3)]

Crosby¹¹: 109/108 + 29/28 + 271/270; 84/85 + 171/170; 50/51 + 220/221

Petrovsky¹²: S1 P/116_{e1}; S1 P/116_{e2}; S1 P/116m

The main results of the new fragments edited here are as follows: 1. Some hitherto unknown parts of the Sanskrit text of the *Buddhanāmasūtra* can be recovered. 2. The find-spot of the fragment SI P/60 of the Petrovsky collection as well as the fragment Crosby 84/85 + 170/171 of the Crosby collection can be determined by

SUNDERMANN, INGRID WARNKE and PETER ZIEME, Berlin, 1996 (Berichte und Abhandlungen, Sonderband I), pp. 392-396. In this context the fragment Hoernle 143 S.A. 8 was also edited, which, similar to the fragment SI L/2, contains Tathāgata names with *dhāraṇīs*. The textual portions of both fragments, however, have no counterpart in the Tibetan or Chinese translation of the *Buddhanāmasūtra*.

⁹ The transliteration of the Stein and Hoernle fragments given below is based mainly on microfilms of the British Museum and the British Library (Oriental and India Office Collections), London, kept in the Seminar für Indologie und Buddhismuskunde, University of Göttingen.

¹⁰ Already identified in J.-U. HARTMANN and K. WILLE, "Die nordturkistanischen Sanskrit-Handschriften der Sammlung Hoernle (Funde buddhistischer Sanskrit-Handschriften, II)", in *Sanskrit-Texte aus dem buddhistischen Kanon: Neuentdeckungen und Neueditionen II*, Göttingen, 1992 (Sanskrit-Wörterbuch der buddhistischen Texte aus den Turfan-Funden, Beiheft 4), pp. 34 [Photo 162].

¹¹ About this collection housed in the Library of Congress (Washington, D.C.) see R.E. EMMERICK, "The Crosby Collection", in *Proceedings of the XXXII International Congress for Asian and North African Studies, Hamburg 25th-30th August 1986* (ZDMG-Suppl. 9), ed. A. WEZLER and E. HAMMERSCHMIDT, Stuttgart, 1992, pp. 672-674; *dto.*, "Notes on the Crosby Collection", in *Medioiranica, Proceedings of the International Colloquium organized by the Katholieke Universiteit Leuven from the 21st to the 23rd of May 1990*, ed. W. SKALMOWSKI and A. van TONGERLOO, Leuven, 1993, pp. 57-64. On p. 672 and p. 57 respectively he refers to several fragments belonging to a manuscript containing many Buddha names. The transliteration of the fragments given below is based on photos which Professor EMMERICK kindly entrusted to my care for edition.

¹² In the description of the fragments (BB 34, p. 283, no. 4) four fragments are listed (SI P/71 a, SI P/116e, SI /116m). Only the largest fragment SI P/71 a has been edited yet. I made a transliteration of the remaining three fragments given below during a four day stay in St. Petersburg in 1996.

discovering a missing part of the corresponding folio in the Stein collection. 3. Altogether there are parts of at least 8 manuscripts of the Buddhānāmasūtra extant:

- a. SI P/70
- b. SI P/61, Hoernle G I [Or. 6403B(1); Godfrey-MS.]¹³
- c. SI P/60 + Stein D.iv.3 + Hoernle G7 [Or. 6403B(3); Godfrey-MS.]¹⁴
- d. SI P/71a
- e. Hoernle 143 S.A. 14 (S.A.^{IV})¹⁵
- f. Crosby 109/108 + 29/28 + 271/270¹⁶
- g. Crosby 84/85 + 170/171 + Stein Kha.vi.3, Crosby 50/51 + 220/221
- h. Stein Kha. i.316

At the moment the remaining five fragments cannot be assigned definitely to one of these eight MSS. The script of all fragments edited here is a variant on the Southern Turkestan Brāhmī¹⁷.

¹³ 13 Cf. K. WILLE, *op. cit.*, p. 393: fol. no. (1) or (2) (SI P/61, fragm. 7), 5 (SI P/61, fragm. 6), (7) (SI P/61, fragm. 8), 9-11 (Godfrey MS.); O. von HINÜBER, "Dharaṇīs aus Zentralasien", p. 171 restored the missing foliation numbers of SI P/61 as follows: (1), 5, (8).

¹⁴ O. v. HINÜBER (Ibid) has shown convincingly that the folios Hoernle G I [signature Or. 6403B(1); Godfrey MS.] do not belong to the same manuscript as SI P/60 as was postulated in BB 34, p. 279.

¹⁵ Edited as SHT 4392 in K. WILLE, *op. cit.*, pp. 394 f.

¹⁶ Looked at from the paleographical point of view (i.e. ruling, difference between the *akṣaras ma, bha*, and the vowel sign *e*) the fragments of Crosby 109/108 ff. and Crosby 84/85 ff. belong to different manuscripts.

Fragment 4 a. Stein D. iv.3 (CA.) [signature Or. 8212.40]

The fragment was excavated in Dandān-uiliq at shrine D. iv during the first expedition of M.A. Stein and is the missing right part of the folio SI P/60²⁴. He stayed in Dandān-uiliq from the 18th of December 1900 till the 4th of January 1901. For a description of the fragment see Ancient Khotan I, p. 295: "**D. iv.3.** MS. on paper; Brahmī; No. 22.
